Coverage Policy/Guideline									
Name:		Rystiggo (rozanolixizumab)		Page:		1 of 2			
Effective Date:		11/27/2024		Last Revie	w Date:	10/22/2024			
Applies to:	⊠Illinois		□Florida	⊠New Jersey					
	⊠Maryland		⊠Florida Kids	⊠Pennsylvania Kids					
	□Michigan		⊠Virginia	⊠Kentucky PRMD					

#### Intent:

The intent of this policy/guideline is to provide information to the prescribing practitioner outlining the coverage criteria for Rystiggo under the patient's prescription drug benefit.

## **Description:**

## **FDA-Approved Indication**

Rystiggo is indicated for the treatment of generalized myasthenia gravis (gMG) in adult patients who are anti-acetylcholine receptor (AChR) or anti-muscle-specific tyrosine kinase (MuSK) antibody positive.

All other indications are considered experimental/investigational and not medically necessary.

# **Applicable Drug List:**

Rystiggo

## **Policy/Guideline:**

### **Documentation:**

Submission of the following information is necessary to initiate the prior authorization review:

- A. For initial requests, chart notes, medical records, or claims history documenting:
  - Positive anti-acetylcholine receptor (AChR) or anti-muscle-specific tyrosine kinase (MuSK) antibody test
  - 2. Myasthenia Gravis Foundation of America (MGFA) clinical classification
  - 3. MG activities of daily living score
  - 4. Previous medications tried, including response to therapy. If therapy is not advisable, documentation of clinical reasons to avoid therapy.
- B. For continuation requests: Chart notes or medical record documentation supporting positive clinical response.

#### **Exclusions:**

The requested medication will not be used in combination with another neonatal Fc receptor blocker (e.g., Vyvgart, Vyvgart Hytrulo) or complement inhibitor (e.g., Soliris, Ultomiris, Zilbrysq).

Name:		Rystiggo (rozanolixizumab)		2 of 2
Effective Date: 11/27/2024			Last Review Date:	10/22/2024
Applies	⊠Illinois	□Florida	⊠New Jersey	
Applies to:	⊠Maryland	⊠Florida Kids	⊠Pennsylvania Kids	
	□Michigan	⊠Virginia	⊠Kentucky PRMD	

# **Criteria for Initial Approval:**

# Generalized myasthenia gravis (gMG)

Authorization of 6 months may be granted for treatment of generalized myasthenia gravis (gMG) when all of the following criteria are met:

- A. Anti-acetylcholine receptor (AChR) or anti-muscle-specific tyrosine kinase (MuSK) antibody positive
- B. Myasthenia Gravis Foundation of America (MGFA) clinical classification II to IV
- C. MG activities of daily living (MG-ADL) total score of greater than or equal to 5
- D. Meets one of the following:
  - Member has had an inadequate response or intolerable adverse event to at least two immunosuppressive therapies over the course of at least 12 months (e.g., azathioprine, corticosteroids, cyclosporine, methotrexate, mycophenolate, tacrolimus)
  - 2. Member has had an inadequate response or intolerable adverse event to at least one immunosuppressive therapy and intravenous immunoglobulin (IVIG) over the course of at least 12 months
  - 3. Member has a documented clinical reason to avoid therapy with immunosuppressive agents and IVIG

### Criteria for Continuation of Therapy

Authorization of 12 months may be granted for continued treatment in members requesting reauthorization when there is no evidence of unacceptable toxicity or disease progression while on the current regimen and member demonstrates a positive response to therapy (e.g., improvement in MG-ADL score, MG Manual Muscle Test (MMT), MG Composite).

## **Approval Duration and Quantity Restrictions:**

**Initial and Renewal Approval:** 6 months

Quantity Level Limit: Reference Formulary for drug specific quantity level limits
